

8x8 for the Recruitment Industry

8x8 takes the recruitment industry to the next level with smarter, more efficient ways to connect clients with their candidates.

Sourcing the right talent means you need to remain engaged, flexible and agile. Speed up the screening of candidates using video conferencing, and collaborate over multiple locations. 8x8 will work with you on a future ready communications solution.

Integration with leading recruitment software

8x8 integrates with the most popular recruitment applications to enhance client services and extend your competitive advantage. 8x8's integrations provide rich communication tools to the applications used everyday by recruitment consultants to save time and improve productivity.

jobscience

Bullhorn

Automatically load candidate data within your CRM solution when a consultant initiates a call. By utilising Screen Pop your consultants will spend less time searching through records and more time engaged in positive conversations and building better client relationships. 8x8 automatically logs interactions and consultant notes within the candidate record providing a 360-degree view.

If you make a high volume of outbound calls, 8x8's click-to-dial capabilities allow you to call directly from your CRM. This will reduce the amount of time spent manually entering candidate phone numbers and ensures the right number is dialled at the first attempt.

The benefits of using 8x8

Collaboration tools

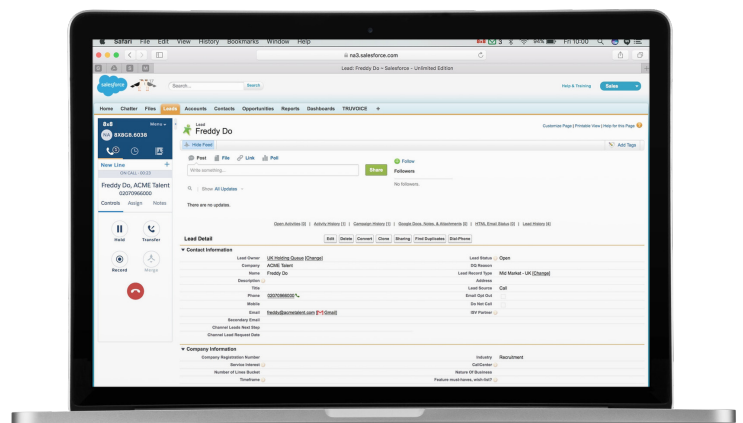

See who is on the phone and who is available by checking their status icon. Quickly resolve questions and communicate using 8x8's safe and secure Instant Messaging.

Multiple devices

8x8 is all about enabling you to communicate in any way, on any device, at any time. You get continuous communications, from desk to computer to mobile, with voice, video calls and chat.

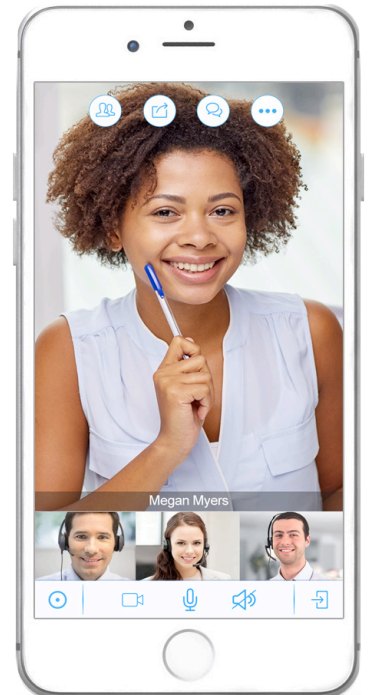

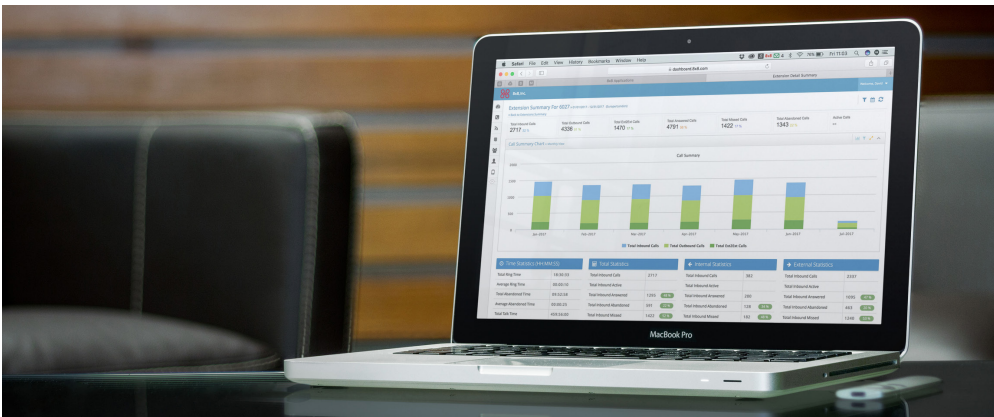

Global reach with a local touch

8x8 offers all of the local number support required by national and international recruitment companies. Portray a local presence when speaking with candidates and increase the chances of a successful call.

Better visibility of your consultants' performance

8x8 Virtual Office delivers an unmatched suite of analytics tools that give you enterprise-level business intelligence about your communications. Virtual Office captures finely detailed data on all call activity associated with your 8x8 cloud-based PBX and presents it to you in easy-to-use views and reports, allowing you to take quick, decisive action. Get fast answers about internal and external call activity, call queues and ring groups and the health of your communications system.

Virtual Office Meetings

Sifting through hundreds of résumés to find talented applicants can be tedious. When the candidates are as busy as you are, coordinating the right time for an on-site interview can lead to endless back and forth. Advanced video and web conferencing solutions enable recruiters to make quicker connections while providing the crucial face-to-face element. 8x8's Virtual Office can help you by integrating video into your company's phone system, allowing you to seamlessly connect with both your current co-workers and future prospects.

“ 8x8's Virtual Office solution was a no-brainer for us. Working on the move and being contactable at any time is a crucial part of working in the recruitment industry. By allowing us to work anywhere, 8x8 has allowed us to develop our remote working capabilities and revolutionise the way our staff collaborate across the world.
