

# Is It Time to Cut the Cord on Your Legacy PBX?

\$4M per year is the average amount businesses lose due to downtime.<sup>1</sup> What does this have to do with your PBX? *Everything.*

Today's workers collaborate more than ever before, and at the heart of all this communication is your PBX. Simply put: Can your organization afford an outdated PBX infrastructure?

## Top Signs Your PBX Is Aging

Can you spot the symptoms of an outdated communication system in your business?

Lost productivity

Poor audio quality

Difficulty incorporating mobile/BYOD

Trouble extending communications services to new locations

Limited access to communication capabilities for remote workers

Obsolescence of key PBX components

## 5 Risks of Sticking with a Legacy PBX

If your business suffers from an aging infrastructure, it could face some serious risks:

System outages and unplanned downtime

Discontinued hardware components

Fewer in-house employees with telco experience

High upgrade costs

Competitive disadvantage

## It's Time: Consider Cloud Communications

80% of IT professionals deploy cloud communications to gain access to advanced features and capabilities.<sup>1</sup>

43% of IT professionals indicate that cloud-based or hosted services will be important for future business practices.<sup>2</sup>

But the benefits don't stop with advanced capabilities

## 5 Reasons to Consider Cloud Communications

Eliminate multiple vendors

Easily scale communications as your business grows

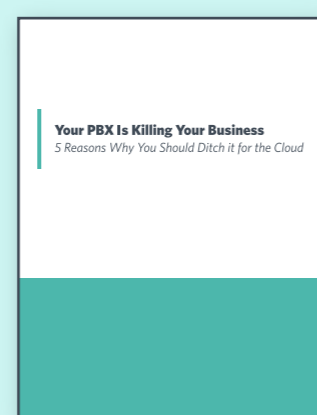

Stay compatible with the latest communication services, like full-featured, seamless communications on any device

Gain actionable insights from your communications activity

Maintain communications during unexpected disasters

### Is Your PBX Putting Your Business at Risk?
