

# 8x8 SIP Trunking

Keep your IP PBX and phones but save money on local, long distance, toll-free and international calling. How cool is that?

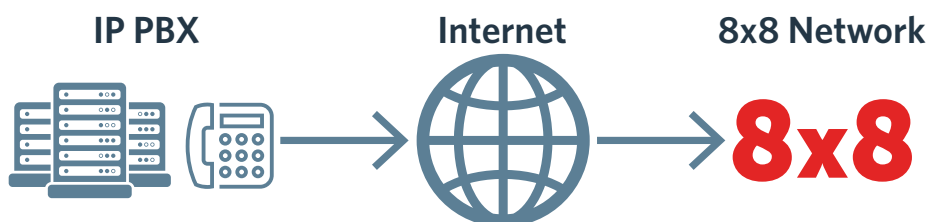

## Keep your IP PBX. Save on Your Phone Calls

If you've already got a long-term commitment to your IP PBX and are spending too much on your phone service, you might be looking for ways to lower all your calling costs—without replacing your phone system or phones. Why not reduce your monthly phone bills by running voice and data on the same network?

## 8x8 SIP Trunking

8x8 SIP Trunking is a broadband agnostic, business-class voice solution that offers great savings on local, long distance and international calling to companies that have already made the move to an IP-enabled phone system. Enhance your SIP-enabled phone system with 8x8's world-class SIP Trunk dial tone service which provides lower costs, unlimited lines and works with virtually any high-speed Internet connection.

With 8x8 SIP Trunking you save money on local, long distance, toll-free and international calling.

## Key Benefits

- Robust global network
- No minimums; pay-as-you-grow scalability
- Single source provider, leveraging all your communication and contact center needs
- Lower your overall calling costs
- Keep your existing IP PBX phone system and telephones and see a strong ROI
- Use this service for outbound or choose to use for both outbound and inbound, while keeping your phone numbers
- Use your existing broadband Internet connections
- Enjoy unlimited calling between sites
- 26 top tier carriers worldwide provide a high level of uptime, redundancy and quality
- With over 4 billion calls a year you'll leverage the leader, and see significant savings over other carriers
- Use what you need, with a minimal volume commitment
- Quick activation will have you saving instantly

## Features

Why pay the monthly recurring charges associated with maintaining two distinct voice and data networks when you can realize significant and immediate savings by running voice as an application on your existing data network?

### 8x8 SIP Trunking includes:

- Free calling between 8x8 extensions—Great for branch offices and remote workers
- No minimums—Pay-as-you-grow scalability
- Number portability—Use for outbound or choose to keep existing phones and toll-free numbers
- Flexible service plans—With 6-second billing increments
- Inbound/outbound service—with dedicated rates
- Toll-free numbers—Port existing numbers or we can assign new ones
- Award-winning 8x8 digital voice network
- Global footprint—With over 7,000 rate centers

In addition to traditional calling features, 8x8 SIP Trunking offers incredible nationwide calling rates and huge savings on toll-free and international calling, saving many customers up to 50% or more on usage alone.

## How it works

Delivered over the award-winning 8x8 digital voice network, 8x8 Virtual Trunking is a scalable and affordable alternative to traditional dial-tone, offering local, long distance, toll free and international calling at incredibly low rates.

IP Trunking enhances your SIP-enabled phone system with 8x8's world class SIP trunk dial tone service. Our standards-based SIP Trunking service works with virtually any IP PBX. Every SIP Trunking account has access to unlimited concurrent calls limited only by your available bandwidth.
